

Product Name :
Aluminium Scaffold

Product Code :
LIM-CAT-L0024-00007

Description :

Aluminium Scaffold

Technical Specification :

Aluminium scaffold

Size: 178x90x550cm (lwxh) with wheels

Single width tower scaffold is specially used where space has the restriction

The small scaffold tower is working load allowed per tower working platform can be up to 225 Kg. The single width scaffold tower body of the scaffolding is hard, alloy scaffold tower with high tempered and a caster wheel having a dual braking system.

In this Aluminium scaffolding tower, multi- level work can be performed.

The height is 5,5 meters.

Mobile aluminium scaffolding enables easily assembling and dismantling scaffolding.

The 6 rung aluminium a frame ladder are provided as per the customers' requirements.

The best thing about these mobile aluminium tower scaffolding is they are maintenance-free and have the extra stable guard rails for greater stability and safety.

Aluminium mobil tower corrosion-resistant that adds rigidity and durability.
