

Product Name :
Vacuum Pumps Air Compressor

Product Code :
LIM-CAT-L0044-00037

Description :

Vacuum Pumps Air Compressor

Technical Specification :

Vacuum Pumps, Air Compressor

Sealed and high temperature resistant pre-lubricated bearings.

Well designed cooling system of air cooled inter/after coolers.

Special material piston ring which retains its properties under high temperature working conditions.

Piston ring outer surface always in contact with the cylinder bore even after thousands of hours of running and corresponding wear ensuring unchanged pumping up time.

Special material piston ensures the retention of cylinder bore finish in adverse temperature condition and expansion of piston.

Air Tank Capacity (L): 220 L

Discharge Pressure (bar): 10 bar

Type: Vacuum Pump.
