**Product Name:** 

Bitumen Extraction Machine Manual

Product Code:

## **Description:**

Bitumen Extraction Machine Manual

## **Technical Specification:**

The Centrifuge Extractors are used for determination of bitumen percentage in hot mixed paving mixtures and pavement samples.

The mix is added with a solvent and dissolved bitumen is removed by centrifugal action.

The Extractors are available in two versions, Hand operated and motorised electrically driven.

Type Of Testing Machines: Bitumen

Material: Mild Steel

Automation Grade: Manual

Color: Blue
