

Product Name :
Common Rail Tester Injector Return Flow Rate

Product Code :
LIM-CAT-L0072-00065

Description :

Common Rail Tester Injector Return Flow Rate

Technical Specification :

Common Rail Tester Injector return flow rate

Test equipment for return pressure measurement of piezo common rail injectors.

Suitable for testing the quality of a common rail injector (good/bad statement).

The devices have a transparent test block made of Plexiglas (6 test units), with which possibly existing air bubbles can be recognized.

Incl. all common hose adapters.

Automatic control of the test oil temperature.

Computer controlled system.

Manuel and automatic testing system.

Test plan according to the injector number.

Test reports for results and save reports.

Safety glass which provides.

large working space.

Clamping set which the user can install injectors easily.

Gas and fan cooling system.

Laboratory instruments manufacturers India
