

Product Name :

Voltage Tester 2-Pole, Benning Duspol Analogue 12 -
1,000 V AC/DC, CAT IV 600 V

Product Code :

LIM-CAT-L0072-00076

Description :

Voltage Tester 2-Pole, Benning Duspol Analogue 12 - 1,000 V AC/DC, CAT IV 600 V

Technical Specification :

Voltage tester 2-pole, Benning Duspol analogue 12 - 1,000 V AC/DC, CAT IV 600 V

The 2-Pole Voltage Tester in a robust housing with rubberized grip surface does not require a battery and is always ready for use. The additional vibration alarm reliably warns of dangerous voltages.

The voltage tester also has a rotating field test function as well as the single-pole phase conductor test. Residual current circuit breakers can be deliberately triggered via the load connection.

Protection class: IP65

Weight: 450 g

Width: 85 mm

Category: Bipolar voltage tester

Product type: Bipolar voltage tester

Type: DUSPOL analog

Display: LED + vibration

Measuring category: CAT III 1000 V + CAT IV 600 V

Measuring function: rotating field test + RCD test + phase test

Length (depth): 330 mm

Height: 55 mm

Measuring range V/DC max.: 1000 V

Measuring range V/AC min.: 12 V

Measuring range V/DC min.: 12 V
Measuring range V/AC max.: 1000 V
Measuring range V/AC: 12 to 1000 V
Measuring range V/DC: 12 to 1000 V.
