Product Name :	**Product Code :**
Measuring Cable Set	LIM-CAT-L0072-00091

Description :

Measuring Cable Set

Technical Specification :

Measuring cable set
92 parts
Suitable for automotive and 12 V batteries
Set with various test lead adapters to simplify troubleshooting directly on the vehicle
With extensive connection elements, including polarity tester, with which Hall sensors and photosensors can be tested, as well as measuring potentiometer for checking the temperature sensor and tank sensor
Applicable with multimeter
Info on contents:3 pieces each of flat plugs, flat receptacles, round plugs, pin cable plugs and pin cable receptacles
Assembly details:
5K - ohm resistance regulator / potentiometer suitable for coolant temperature sensor, among other things, or else to check the oil temperature sensor.
Two-color LED test cable to determine the polarity - LED lamp lights green = positive polarity - LED lamp lights red = negative polarity
Can be used in conjunction with alligator clips, test probes and test prods
Includes plugs for changing the airbag (SRS) and seatbelt tensioning systems
Alligator clips with max. jaw opening of 30 mm, can be combined with test probes and test needles
Test probes can be used with alligator clips for testing cables
Test needle for piercing the cable to be tested

Sizes round plug: 0.8 / 1.5 / 2.0 / 3.5 / 4.0 mm sizes flat plug: 0.8 / 1.2 / 2.0 / 2.5 / 3.0 / 5.0 / 6.0 mm
2 x 5K-Ohm potentiometer infinitely variable 2 x Two-color LED test cable for determining polarity - Positive polarity = LED green - Negative polarity = LED red 2 x SRS test resistor plugs for SRS airbag and seatbelt tensioning systems 2 x alligator clips jaw opening up to 30 mm 2 x test probes for use with cable to be tested and alligator clips 4 x test needles u. a. o. for testing very small plug-in connections 2 x bridging plugs 1 (female) to 2 (male) connections 2 x connecting cables, each 1 m long
