

Product Name :
Transmission Line Trainer

Product Code :
LIM-CAT-L0084-00002

Description :

Transmission Line Trainer

Technical Specification :

In telecommunications transmission lines are used to convey signals from one point to another. The line properties become very important especially in multi-channel systems. The TLT is a unique design for experimenting with various properties of a transmission line. The unit provides the basic concepts of a coaxial line and includes all devices and accessories required to conduct the experiments.
