

Product Name :
Set for performing experiments in the field of Electric
current and Magnetism

Product Code :
LIM-CAT-L0018-00006

Description :

Set for performing experiments in the field of Electric current and Magnetism

Technical Specification :

Set for performing experiments in the field of Electric current and Magnetism.

Set consists of:

Plastic plate

A set of styrofoam balls

Universal socket

Rubbing sticks/rods and cloths

Magnetic needle with the stand and holder for possibility of turning

Pendant made of Elderberry heart

Bridge plug

Switch

Bulb and case for the bulb

LED diode

Set of Batteries

Crocodile clips with plug

A plastic cup

Copper wire

Dipping wire

Cables

Samples of materials
Iron filings
Rope engine
Electric bell
Magnetic sticks
Trolley
Test tube
Iron wires
Compasses and rosettes
Plastic packaging with lid, for the equipment.

Set for performing experiments in the field of Electric current and Magnetism, Set for performing experiments in the field of Electric current and Magnetism Bulk Suppliers, Set for performing experiments in the field of Electric current and Magnetism Tools, Set for performing experiments in the field of Electric current and Magnetism Set for performing experiments in the field of Electric current and Magnetisms, Set for performing experiments in the field of Electric current and Magnetism Manufacturers, Set for performing experiments in the field of Electric current and Magnetism Suppliers from India, China, Kenya.

Laboratory instruments manufacturers India
