Product Name :
Steep Plane With the Ruler and Accessories

Product Code :
LIM-CAT-L0018-00012

Description :

Steep Plane With the Ruler and Accessories

Technical Specification :

Steep plane with the ruler and accessories

The structure is made of metal, so it provides resistivity and robustness.

It consists of 2 metal plates with a hinge at one end; one of the plates is used as a base, and the other one as an oblique plane.

The plane, that acts as a slope, represents graduated scale 20-40

cm (divided by 1 cm) on one side, so the distance could be measured along. It can be tilted and adjusted at any angle between 0 and 40°. Vertical scale 0-25 cm is also printed so the height of the slope could be measured and recorded. The instrument is completed with a plastic trolley with a hook, set of weights (including 1 x 100 g, 1 x 50 g and 1 x 20 g) and a container with a light string.
